Table of contents of the book "C"

- Preface
  - About This Book
  - The Success of C
  - Standards
  - Hosted and Free-Standing Environments
  - Typographical conventions
  - Order of topics
  - Example programs
  - Deference to Higher Authority
  - Address for the Standard
- Chapter 1. An Introduction to C
  - 1.1. The form of a C program
  - 1.2. Functions
  - 1.3. A description of Example 1.1
  - 1.4. Some more programs
  - 1.5. Terminology
  - 1.6. Summary
  - 1.7. Exercises
- Chapter 2. Variables and Arithmetic
  - 2.1. Some fundamentals
  - 2.2. The alphabet of C
  - 2.3. The Textual Structure of Programs
  - 2.4. Keywords and identifiers
  - 2.5. Declaration of variables
  - 2.6. Real types
  - 2.7. Integral types
  - 2.8. Expressions and arithmetic
  - 2.9. Constants
  - 2.10. Summary
  - 2.11. Exercises
- Chapter 3. Control of Flow and Logical Expressions
  - 3.1. The Task ahead
  - 3.2. Control of flow
  - 3.3. More logical expressions
  - 3.4. Strange operators
  - 3.5. Summary
  - 3.6. Exercises
- Chapter 4. Functions
  - 4.1. Changes

    - 4.2. The type of functions
    - 4.3. Recursion and argument passing
    - 4.4. Linkage
    - 4.5. Summary
    - 4.6. Exercises
- Chapter 5. Arrays and Pointers
    - 5.1. Opening shots
    - 5.2. Arrays
    - 5.3. Pointers
    - 5.4. Character handling
    - 5.5. `Sizeof` and storage allocation
    - 5.6. Pointers to functions
    - 5.7. Expressions involving pointers
    - 5.8. Arrays, the `&` operator and function declarations
    - 5.9. Summary
    - 5.10. Exercises
- Chapter 6. Structured Data Types
    - 6.1. History
    - 6.2. Structures
    - 6.3. Unions
    - 6.4. Bitfields
    - 6.5. Enums
    - 6.6. Qualifiers and derived types
    - 6.7. Initialization
    - 6.8. Summary
    - 6.9. Exercises
- Chapter 7. The Preprocessor
    - 7.1. Effect of the Standard
    - 7.2. How the preprocessor works
    - 7.3. Directives
    - 7.4. Summary
    - 7.5. Exercises
- Chapter 8. Specialized Areas of C
    - 8.1. Government Health Warning
    - 8.2. Declarations, Definitions and Accessibility
    - 8.3. `Typedef`
    - 8.4. `Const` and `volatile`
    - 8.5. Sequence points
    - 8.6. Summary
- Chapter 9. Libraries
    - 9.1. Introduction
    - 9.2. Diagnostics
    - 9.3. Character handling
    - 9.4. Localization

    - 9.5. Limits
    - 9.6. Mathematical functions
    - 9.7. Non-local jumps
    - 9.8. Signal handling
    - 9.9. Variable numbers of arguments
    - 9.10. Input and output
    - 9.11. Formatted I/O
    - 9.12. Character I/O
    - 9.13. Unformatted I/O
    - 9.14. Random access functions
    - 9.15. General Utilities
    - 9.16. String handling
    - 9.17. Date and time
    - 9.18. Summary
- Chapter 10. Complete Programs in C
    - 10.1. Putting it all together
    - 10.2. Arguments to `main`
    - 10.3. Interpreting program arguments
    - 10.4. A pattern matching program
    - 10.5. A more ambitious example
    - 10.6. Afterword
- Answers to Exercises
    - Chapter 1
    - Chapter 2
    - Chapter 3
    - Chapter 4
    - Chapter 5
    - Chapter 6
    - Chapter 7
